

Recombinant Human PASK Protein (S949-S1323), GST tagged

Cat. No. PASK-1119H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human GST-TEV-PASK (S949-S1323 end) Protein was expressed in Insect cell.
Species	Human
Source	Insect Cells
ProteinLength	S949-S1323
Description	Serine/threonine-protein kinase involved in energy homeostasis and protein translation. Phosphorylates EEF1A1, GYS1, PDX1 and RPS6. Probably plays a role under changing environmental conditions (oxygen, glucose, nutrition), rather than under standard conditions. Acts as a sensor involved in energy homeostasis: regulates glycogen synthase synthesis by mediating phosphorylation of GYS1, leading to GYS1 inactivation. May be involved in glucose-stimulated insulin production in pancreas and regulation of glucagon secretion by glucose in alpha cells; however such data require additional evidences. May play a role in regulation of protein translation by phosphorylating EEF1A1, leading to increase translation efficiency. May also participate in respiratory regulation.
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
Purity	90%
