

Recombinant Human PPARG Protein (P234-Y505), Tag Free

Cat. No. PPARG-0777H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human PPAR(P234-Y505 end) Protein was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	P234-Y505
Description	Nuclear receptor that binds peroxisome proliferators such as hypolipidemic drugs and fatty acids. Once activated by a ligand, the nuclear receptor binds to DNA specific PPAR response elements (PPRE) and modulates the transcription of its target genes, such as acyl-CoA oxidase. It therefore controls the peroxisomal beta-oxidation pathway of fatty acids. Key regulator of adipocyte differentiation and glucose homeostasis. ARF6 acts as a key regulator of the tissue-specific adipocyte P2 (aP2) enhancer. Acts as a critical regulator of gut homeostasis by suppressing NF-kappa-B-mediated proinflammatory responses. Plays a role in the regulation of cardiovascular circadian rhythms by regulating the transcription of ARNTL/BMAL1 in the blood vessels.
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
Purity	90%
