Cat. No. USP44-0354H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human USP44(M1-S712 end) Protein was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	M1-S712
Description	Deubiquitinase that plays a key regulatory role in the spindle assembly checkpoint or mitotic checkpoint by preventing premature anaphase onset. Acts by specifically mediating deubiquitination of CDC20, a negative regulator of the anaphase promoting complex/cyclosome (APC/C). Deubiquitination of CDC20 leads to stabilize the MAD2L1-CDC20-APC/C ternary complex (also named mitotic checkpoint complex), thereby preventing premature activation of the APC/C. Promotes association of MAD2L1 with CDC20 and reinforces the spindle assembly checkpoint. Acts as a negative regulator of histone H2B (H2BK120ub1) ubiquitination.
Form	Liquid
Endotoxin	< 0.01 EU per μg of the protein
Purity	90%
