

Recombinant Human HOXA13 Protein, N-His tagged

Cat. No. HOXA13-01H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human HOXA13 Protein with N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	In vertebrates, the genes encoding the class of transcription factors called homeobox genes are found in clusters named A, B, C, and D on four separate chromosomes. Expression of these proteins is spatially and temporally regulated during embryonic development. This gene is part of the A cluster on chromosome 7 and encodes a DNA-binding transcription factor which may regulate gene expression, morphogenesis, and differentiation. Expansion of a polyalanine tract in the encoded protein can cause hand-foot-uterus syndrome, also known as hand-foot-genital syndrome.
