

Recombinant Human PAX3 Protein, C-His tagged

Cat. No. PAX3-58H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human PAX3 protein with C-His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene is a member of the paired box (PAX) family of transcription factors. Members of the PAX family typically contain a paired box domain and a paired-type homeodomain. These genes play critical roles during fetal development. Mutations in paired box gene 3 are associated with Waardenburg syndrome, craniofacial-deafness-hand syndrome, and alveolar rhabdomyosarcoma. The translocation t(2;13)(q35;q14), which represents a fusion between PAX3 and the forkhead gene, is a frequent finding in alveolar rhabdomyosarcoma. Alternative splicing results in transcripts encoding isoforms with different C-termini.
