

Recombinant Human TIE1 Protein, N-His tagged, Biotinylated

Cat. No. TIE1-101HB **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Biotinylated recombinant Human TIE1 protein with N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a member of the tyrosine protein kinase family. The encoded protein plays a critical role in angiogenesis and blood vessel stability by inhibiting angiopoietin 1 signaling through the endothelial receptor tyrosine kinase Tie2. Ectodomain cleavage of the encoded protein relieves inhibition of Tie2 and is mediated by multiple factors including vascular endothelial growth factor. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
