| <b>Product Overview</b> | Active Recombinant Human SIRP-alpha/CD172a Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu31-Arg370) of human SIRP alpha/CD172a (Accession #NP_542970.1) fused with an Fc, 6×His tag at the C-terminus.                                                                                                                                                                                                                                                                                            |

| <b>Form</b>             | Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Bio-activity</b>     | <p>1.Measured by its binding ability in a functional ELISA. Immobilized Recombinant Human CD47 at 1 µg/mL (100 µL/well) can bind Recombinant Human SIRP alpha with a linear range of 1-6 ng/mL.</p> <p>2.Loaded Human SIRP-alpha/CD172a Protein, C-hFc&amp;His on ProA Biosensor, can bind Human CD47 Protein, C-His Tag with an affinity constant of 11.1 nM as determined in BLI assay (Gator).</p> <p>3.Measured by the ability of the immobilized protein to support the adhesion of the OVCAR-3 cells. The ED50 for this effect is 0.53-2.12 µg/mL.</p> |
| <b>Molecular Mass</b>   | 80-100 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
