

## Recombinant Human DNER protein, hFc&His-tagged

**Cat. No.** DNER-1245H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human DNER Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Arg29-His637) of human DNER (Accession #NP_620711.3) fused with an Fc, 6×His tag at the C-terminus. |
| <b>Species</b>          | Human                                                                                                                                                                                                                            |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                           |
| <b>ProteinLength</b>    | Arg29-His637                                                                                                                                                                                                                     |
| <b>Form</b>             | Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.                                                                                                                                                                     |
| <b>Molecular Mass</b>   | 125-160 kDa                                                                                                                                                                                                                      |
| <b>Endotoxin</b>        | < 0.01 EU/µg of the protein by LAL method.                                                                                                                                                                                       |
| <b>Purity</b>           | > 97% by SDS-PAGE.                                                                                                                                                                                                               |
| <b>Storage</b>          | Store the lyophilized protein at -20°C to -80 °C for long term.<br>After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week.                                                      |
| <b>Reconstitution</b>   | Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water.                                                                                                                                                     |
