

Recombinant Active Human ATAD2B Protein (953 to 1080), C-6×His tagged

Cat. No. ATAD2B-12H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Active Human ATAD2B Protein (953-1080) with C-6×His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	953 to 1080
Description	The protein encoded by this gene belongs to the AAA ATPase family. This family member includes an N-terminal bromodomain. It has been found to be localized to the nucleus, partly to replication sites, consistent with a chromatin-related function. Alternative splicing of this gene results in multiple transcript variants.
