

## Recombinant Human c-Met (1048-1348) Protein, C-His-tagged

Cat. No. MET32518H    Lot. No. (See product label)

### SPECIFICATION

#### Product Overview

|                      |                                                                                                                                                                                                                                     |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Species              | Human                                                                                                                                                                                                                               |
| Source               | Insect Cells                                                                                                                                                                                                                        |
| Description          | c-Met was expressed and purified from insect cells. The protein was expressed as a HIS-fusion protein and purified by a 3-step chromatographic procedure comprising affinity, ion exchange and size exclusion chromatography steps. |
| Predicted N Terminal | C-terminal                                                                                                                                                                                                                          |
| Molecular Mass       | 34.89 kDa                                                                                                                                                                                                                           |
| Purity               | > 95%                                                                                                                                                                                                                               |
| Storage              | frozen; -80                                                                                                                                                                                                                         |
| Storage Buffer       | 50 mM HEPES 7.0;<br>250 mM NaCl;<br>5% Glycerol;<br>3 mM DTT                                                                                                                                                                        |

### GENE INFORMATION
