

## Recombinant Human GSK3 $\beta$ (35-386) Protein

**Cat. No.** GSK3B24963H    **Lot. No.** (See product label)

### SPECIFICATION

#### Product Overview

|                       |                                                                                                                                                                                                                            |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Species</b>        | Human                                                                                                                                                                                                                      |
| <b>Description</b>    | GSK3 $\beta$ was expressed and purified from insect cells. The protein was expressed as a HIS-fusion protein and purified by a 4-step chromatographic procedure comprising affinity and ion exchange chromatography steps. |
| <b>Molecular Mass</b> | 40 kDa                                                                                                                                                                                                                     |
| <b>Purity</b>         | > 95%                                                                                                                                                                                                                      |
| <b>Storage</b>        | frozen; -80                                                                                                                                                                                                                |
| <b>Storage Buffer</b> | 20 mM MOPS 7.0;93.5 mM NaCl;10% Glycerol;1mM DTT;1xPIC                                                                                                                                                                     |

### GENE INFORMATION

|                        |                       |
|------------------------|-----------------------|
| <b>Gene Name</b>       | GSK3 $\beta$ (35-386) |
| <b>Official Symbol</b> | GSK3B                 |
| <b>Gene ID</b>         | 2932                  |
| <b>UniProt ID</b>      | P49841                |
