

## Recombinant Human TBK1 (1-308)-HIS (D135N) Protein

**Cat. No.** TBK17998H    **Lot. No.** (See product label)

### SPECIFICATION

#### Product Overview

|                       |                                                                                                                                                                                                                     |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Species</b>        | Human                                                                                                                                                                                                               |
| <b>Description</b>    | TBK1 was expressed and purified from insect cells. The protein was expressed as a HISfusion protein and purified by a 4-step chromatographic procedure comprising affinity and size exclusion chromatography steps. |
| <b>Molecular Mass</b> | 36 kDa                                                                                                                                                                                                              |
| <b>Purity</b>         | > 95%                                                                                                                                                                                                               |
| <b>Storage</b>        | frozen; -80                                                                                                                                                                                                         |
| <b>Storage Buffer</b> | 20 mM TRIS 8.0;300 mM NaCl;2 mM TCEP                                                                                                                                                                                |

### GENE INFORMATION

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | TBK1 (1-308)-HIS (D135N)                                                                                                    |
| <b>Official Symbol</b> | TBK1                                                                                                                        |
| <b>Synonyms</b>        | TANK Binding Kinase 1; NF-Kappa-B-Activating Kinase; TANK-Binding Kinase 1; NAK; T2K; Serine/Threonine-Protein Kinase TBK1; |
| <b>Gene ID</b>         | 29110                                                                                                                       |
