

## Amino Agarose

**Cat. No.** Amino-001A    **Lot. No.** (See product label)

### SPECIFICATION

#### Product Overview

|                                 |                                             |
|---------------------------------|---------------------------------------------|
| <b>Cat.no</b>                   | Amino-001A                                  |
| <b>Matrix</b>                   | 6% cross-linked agarose                     |
| <b>Average particle size</b>    | 90 µm                                       |
| <b>Ligand</b>                   | Primary amine                               |
| <b>Dynamic binding capacity</b> | 17-22 µmol Cl-/ml medium                    |
| <b>Recommended flow rate</b>    | 200-400 cm/h                                |
| <b>Chemical stability</b>       | Stable to all commonly used aqueous buffers |
