

Recombinant Human PDE3B, GST-tagged, Active

Cat. No. PDE3B-474H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinanthuman PDE3B (654-end) was expressed by <i>baculovirus</i> in <i>Sf9 insect cell</i> using an N-terminal GST tag. MW=85kDa.
Species	Human
Source	Sf9 Cells
Protein Length	654-end a.a.
Description	PDE3B is a member of the phosphodiesterase family of proteins that play a critical role in regulating intracellular levels of cAMP and cGMP. PDE3B has high affinity for cAMP and is inhibited by cGMP as well as specific inhibitors such as cilostamide and milrinone. PDE3B is phosphorylated and activated in response to insulin and agents that increase cAMP. Leptin can increase the activity of PDE3B in the hypothalamus leading to a decrease in cAMP concentration.
Sequence	654-end.
Applications	PDE Assay.
Storage And Stability	Store product at –70oC. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
