

Recombinant Human Glutathione S-transferase Mu 4, His-tagged

Cat. No. GSTM4-780H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human GSTM4 protein, fused to His-tag at N-terminus, was expressed in <i>E.coli</i> and purified by using conventional chromatography techniques. MW =27.7kDa (238aa) confirmed by MALDI-TOF.
Species	Human
Source	E.coli
Description	Glutathione S-transferase Mu 4 isoform 1, also known as GSTM4, is member of the glutathione s-transferase (GST) family of proteins. There are eight families of GST proteins, namely alpha, kappa, mu, omega, pi, sigma, theta and zeta, each of which is composed of proteins that have a variety of functions throughout the cell. The mu class of enzymes functions in the detoxification of electrophilic compounds, including carcinogens, therapeutic drugs, environmental toxins and products of oxidative stress, by conjugation with glutathione.
