

Recombinant Human Annexin A5, His-tagged

Cat. No. ANXA5-1430H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human full-length Annexin 5 Protein was expressed in <i>E. coli</i> cells using a N-terminal His tag. MW=37kDa.
Species	Human
Source	E.coli
Description	Annexin 5 is a member of the annexin family of calcium-dependent phospholipid binding proteins. Annexin 5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. In vitro studies have shown that Annexin 5 is a cellular protein which plays a role in the inhibition of blood coagulation by competing for phosphatidylserine binding sites with prothrombin. Through affinity assays Annexin 5 has been localized on cells that expressed phosphatidylserine on the cell surface, a feature found in apoptosis as well as other forms of cell death.
Sequence	Full-length.
Applications	Western Blot.
Storage And Stability	Store product at -70°C . For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

GENE INFORMATION

Gene Name	ANXA5 annexin A5 [Homo sapiens]
Synonyms	ANXA5; annexin A5; PP4; ANX5; ENX2; anchorin CII; endonexin II; lipocortin V; placental anticoagulant protein I; Annexin-5; Annexin V; Lipocortin V; Endonexin II; Calphobindin I; Placental anticoagulant protein I; Placental anticoagulant protein 4; Thromboplastin inhibitor; Vascular anticoagulant-alpha; VAC-alpha; CBP-I; PAP-I
Gene ID	308
mRNA Refseq	NM_001154
Protein Refseq	NP_001145
UniProt ID	P08758
Chromosome Location	4q27
MIM	131230
Function	calcium ion binding; calcium-dependent phospholipid binding; eukaryotic cell surface binding; phospholipase inhibitor activity; protein binding; receptor tyrosine kinase binding
