

Recombinant Human BH3 Interacting Domain Death Agonist, GST-tagged

Cat. No. BID-1437H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant full-length human BID was expressed by baculovirus in <i>Sf9 insect cell</i> using an N-terminal GST tag. MW = 52kDa.
Species	Human
Source	Sf9 Cells
Description	BID is a BH3 interacting death domain that heterodimerizes with either agonist BAX or antagonist BCL2. BID is a member of the BCL-2 family of cell death regulators and is a mediator of mitochondrial damage induced by caspase-8 (CASP8). BID initiates apoptosis by binding to regulatory sites on prosurvival BCL2 proteins to directly neutralize their function. Multiple alternatively spliced transcript variants of BID have been found, but the full-length nature of some variants has not been defined. BID together with Cathepsins play an important role in the actions of Camptothecin on breast cancer cells.
Sequence	Full-length.
Applications	Western Blot.
Storage And Stability	Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

GENE INFORMATION

Gene Name	BID BH3 interacting domain death agonist [Homo sapiens]
Synonyms	BID; BH3 interacting domain death agonist; FP497; MGC15319; MGC42355; p22 BID
Gene ID	637
mRNA Refseq	NM_00119
Protein Refseq	NP_001187
MIM	601997
UniProt ID	P55957
Chromosome Location	22q11.2
Pathway	Alzheimer"s disease; Amyotrophic lateral sclerosis (ALS); Apoptosis; Natural killer cell mediated cytotoxicity; Pathways in cancer; p53 signaling pathway; Apoptosis
Function	death receptor binding; protein binding
