

# Recombinant Human IFNA8 Overexpression Lysate(Met1-Glu189)

**Cat. No.** IFNA8-1012HCL    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                 |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human IFNA8 Overexpression Lysate(NP_002161.2) (Met1-Glu189) was expressed in HEK293 with a C-terminal polyhistidine tag.                                                                           |
| <b>Species</b>          | Human                                                                                                                                                                                                           |
| <b>Source</b>           | HEK293                                                                                                                                                                                                          |
| <b>ProteinLength</b>    | Met1-Glu189                                                                                                                                                                                                     |
| <b>Form</b>             | Modified RIPA Lysis Buffer: 50 mM Tris-HCl pH 7.4, 150 mM NaCl, 1mM EDTA, 1% Triton X-100, 0.1% SDS, 1% Sodium deoxycholate, 1mM PMSF.                                                                          |
| <b>Molecular Mass</b>   | The recombinant human IFNA8 comprises 177 amino acids and has a predicted molecular mass of 20.9 kDa. The apparent molecular mass of the protein is approximately 28 kDa in SDS-PAGE under reducing conditions. |
| <b>Storage</b>          | Store at 4°C for up to twelve months from date of receipt. After re-dissolution, aliquot and store at -80°C for up to twelve months. Avoid repeated freeze-thaw cycles.                                         |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.                                   |
