

# Recombinant Cynomolgus IFNA8 Overexpression Lysate(Met1-Glu189)

**Cat. No.** IFNA8-1022CCL    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Cynomolgus IFNA8 Overexpression Lysate(G7PS89) (Met1-Glu189) was expressed in HEK293 with a polyhistidine tag at the C-terminus.                                                  |
| <b>Species</b>          | Cynomolgus                                                                                                                                                                                    |
| <b>Source</b>           | HEK293                                                                                                                                                                                        |
| <b>ProteinLength</b>    | Met1-Glu189                                                                                                                                                                                   |
| <b>Form</b>             | Modified RIPA Lysis Buffer: 50 mM Tris-HCl pH 7.4, 150 mM NaCl, 1mM EDTA, 1% Triton X-100, 0.1% SDS, 1% Sodium deoxycholate, 1mM PMSF.                                                        |
| <b>Molecular Mass</b>   | The recombinant cynomolgus IFNA8 comprises 177 amino acids and has a calculated molecular mass of 21 KDa. The apparent molecular mass of it is approximately 33 KDa respectively in SDS-PAGE. |
| <b>Storage</b>          | Store at 4°C for up to twelve months from date of receipt. After re-dissolution, aliquot and store at -80°C for up to twelve months. Avoid repeated freeze-thaw cycles.                       |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.                 |
