

## Human Colon Tissue Lysate

**Cat. No.** Colon-16H    **Lot. No.** (See product label)

### SPECIFICATION

#### Product Overview

|                            |                                                                                                                                                                                                                              |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Species</b>             | Human                                                                                                                                                                                                                        |
| <b>Form</b>                | The lysate was boiled for 5 min in 1 x SDS sample buffer (50 mM Tris-HCl pH 6.8, 12.5% glycerol, 1% sodium dodecylsulfate, 0.01% bromophenol blue) containing 5% $\beta$ -mercaptoethanol.                                   |
| <b>Concentration</b>       | 2.0 mg/ml                                                                                                                                                                                                                    |
| <b>Tissue Type</b>         | Colon                                                                                                                                                                                                                        |
| <b>Safety Testing</b>      | This material has been tested by accepted techniques and has been found to be negative for HBsAg, HIV 1/2, and HCV. Additional patient information may be available upon request.                                            |
| <b>Diagnosis</b>           | Normal                                                                                                                                                                                                                       |
| <b>Expiration Date</b>     | One year from date of receipt                                                                                                                                                                                                |
| <b>Size</b>                | 0.1 mg, 0.5 mg                                                                                                                                                                                                               |
| <b>Storage Instruction</b> | This lysate should be aliquoted in working amounts and may be stored for up to one month at -20°C in a manual defrost freezer. Avoid Repeated Freeze Thaw Cycles. For longer term storage, freeze working aliquots at -70°C. |
