

## Active Recombinant Mouse CD3E & CD3G protein, Fc-His & Fc-Flag-tagged

**Cat. No.** CD3E & CD3G-3034M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                         |

| <b>Product Overview</b> | Recombinant Mouse CD3E&CD3G protein(Asp 23-Asp 108 (CD3E) & Gln 23-Ser 116 (CD3G)), fused with Fc-His and Fc-Flag tag, was expressed in HEK293.                                                                                                                                                                                                                                                         |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>ProteinLength</b>    | Asp 23-Asp 108 (CD3E) & Gln 23-Ser 116 (CD3G)                                                                                                                                                                                                                                                                                                                                                           |
| <b>Form</b>             | Lyophilized from 0.22 µm filtered solution in PBS, pH7.4. Normally trehalose is added as protectant before lyophilization.                                                                                                                                                                                                                                                                              |
| <b>Bio-activity</b>     | Immobilized Mouse CD3E&CD3G Heterodimer Protein,Fc,His Tag&Fc,Flag Tag at 1 µg/mL (100 µL/well) can bind Biotinylated CD3e Monoclonal Antibody (Clone : 145-2C11) with a linear range of 0.2-6 ng/mL.Immobilized CD3E Monoclonal Antibody (Clone : 145-2C11) at 1 µg/mL (100 µL/well) can bind Mouse CD3E&CD3G Heterodimer Protein,Fc,His Tag&Fc,Flag Tag with a linear range of 0.01-0.25 µg/mL.       |
| <b>Molecular Mass</b>   | Mouse CD3E&CD3G Heterodimer Protein,Fc,His Tag&Fc,Flag Tag is produced by co-expression of CD3E and CD3G, has a calculated MW of 41.5 kDa (CD3E) and 41.6 kDa (CD3G). Subunit CD3E is fused with a human IgG1 Fc tag at the C-terminus, followed by a polyhistidine tag and subunit CD3G is fused with a human IgG1 Fc tag at the C-terminus, followed by a Flag tag. As a result of glycosylation, the |

|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | protein migrates as 48-55 kDa under reducing (R) condition, and 100 kDa under non-reducing (NR) condition (SDS-PAGE).                                                                                                                                                                               |
| <b>Endotoxin</b>      | Less than 1.0 EU per µg by the LAL method.                                                                                                                                                                                                                                                          |
| <b>Purity</b>         | >95% as determined by SDS-PAGE.>90% as determined by SEC-MALS.                                                                                                                                                                                                                                      |
| <b>Storage</b>        | For long term storage, the product should be stored at lyophilized state at -20°C or lower. Please avoid repeated freeze-thaw cycles. This product is stable after storage at: -20°C to -70°C for 12 months in lyophilized state; -70°C for 3 months under sterile conditions after reconstitution. |
| <b>Reconstitution</b> | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 µg/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.                                                                                                                       |
