

Recombinant Human TANGO2 Protein, His tagged

Cat. No. TANGO2-23H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TANGO2 Protein with His tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	<p>This gene belongs to the transport and Golgi organization family, whose members are predicted to play roles in secretory protein loading in the endoplasmic reticulum. Depletion of this gene in Drosophila S2 cells causes fusion of the Golgi with the ER. In mouse tissue culture cells, this protein co-localizes with a mitochondrially targeted mCherry protein and displays very low levels of co-localization with Golgi and peroxisomes. Allelic variants of this gene are associated with rhabdomyolysis, metabolic crises with encephalopathy, and cardiac arrhythmia.</p>
Molecular Mass	The protein has a calculated MW of 31 kDa.
