

Active Recombinant Human SSTR2 Full Length Transmembrane protein(Nanodisc)

Cat. No. SSTR2-4967H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SSTR2 Full Length Transmembrane protein(P30874), was expressed in HEK293.
Species	Human
Source	HEK293
Form	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions.
Bio-activity	Elisa plates were added with His/Flag Tag SSTR2-Nanodisc (0.5µg/per well) on an anti-Flag monoclonal antibody pre-coated (0.5µg/per well) plate. Serial diluted anti-SSTR2 monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-SSTR2 monoclonal antibody binding with SSTR2-Nanodisc is 113.2ng/ml.
Molecular Mass	The human full length SSTR2 Protein has a MW of 41.2 kDa.
Storage	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of
