

Recombinant Human GSTA1 Protein (Ala2-Phe222), His tagged

Cat. No. GSTA1-3676H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human GSTA1 (Ala2-Phe222) protein fused with His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Ala2-Phe222
Description	Glutathione S-transferases (GSTs) are involved in the detoxification of carcinogens, and may be linked to carcinogenesis. As a vital component of GSTs, GSTA1 plays an important role in carcinogenesis. GSTA1 expression may be a target molecule in early diagnosis and treatment of lung cancer. Human colonic adenocarcinoma (Caco-2) cells in culture undergo spontaneous differentiation into mature enterocytes in association with progressive increases in expression of glutathione S-transferase alpha-1 (GSTA1). GSTA1 levels may play a role in modulating enterocyte proliferation but do not influence differentiation or apoptosis. GSTA1 may play a key role during pregnancy.
Molecular Mass	25.84 kDa
Purity	>90 % as determined by SDS-PAGE.
