

## Active Recombinant COVID-19 Spike Protein, His Tag (XBB.1.5/Omicron), His-tagged

**Cat. No.** Spike-4749V    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant COVID-19 Protein, His Tag (XBB.1.5/Omicron)(Val 16 - Pro 1213), fused with His tag, was expressed in HEK293.                                                                                                                                                                                                                                                          |
| <b>Species</b>          | Sars-CoV-2                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                                                                                                                                            |
| <b>ProteinLength</b>    | Val 16 - Pro 1213                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Form</b>             | Lyophilized from 0.22 µm filtered solution in PBS with trehalose as protectant.                                                                                                                                                                                                                                                                                                   |
| <b>Bio-activity</b>     | Immobilized Human ACE2, Fc Tag at 5 µg/mL (100 µL/well) can bind SARS-CoV-2 Spike Trimer Protein, His Tag (XBB.1.5/Omicron) with a linear range of 0.1-4 ng/mL. Immobilized SARS-CoV-2 Spike Trimer Protein, His Tag (XBB.1.5/Omicron) at 1 µg/mL (100 µL/well) can bind Anti-SARS-CoV-2 Spike RBD Antibody, Chimeric mAb, Human IgG1 (AM130) with a linear range of 0.1-1 ng/mL. |
| <b>Molecular Mass</b>   | This protein carries a polyhistidine tag at the C-terminus. The protein has a calculated MW of 137.8 kDa. The protein migrates as 160-200 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.                                                                                                                                                                       |
| <b>Endotoxin</b>        | Less than 1.0 EU per µg by the LAL method.                                                                                                                                                                                                                                                                                                                                        |
| <b>Purity</b>           | >95% as determined by SDS-PAGE. >90% as determined by SEC-MALS.                                                                                                                                                                                                                                                                                                                   |

**Storage** For long term, the product should be stored at lyophilized state at -20°C or lower. Please avoid repeated freeze-thaw cycles. This product is stable after at: -20°C to -70°C for 12 months in lyophilized state; -70°C for 3 months under sterile conditions after reconstitution.

**Reconstitution** It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.

## GENE INFORMATION

**Gene Name** S surface glycoprotein [ Severe acute respiratory syndrome coronavirus 2 ]

**Official Symbol** Spike

**Synonyms** Spike; S1 protein; Spike glycoprotein Subunit1; S glycoprotein Subunit1; Spike protein S1; COVID-19 Omicron

**Gene ID** 43740568

**Protein Refseq** YP\_009724390.1

**UniProt ID** P0DTC2
