Rhesus monkey Medulla Corpus Callosum Lysate

Cat. No. Medulla Corpus Callosum -338R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	
Species	Rhesus macaque
Source	Rhesus Brain: Medulla Corpus Callosum
Concentration	2 mg/mL or better
Tissue Type	Brain: Medulla Corpus Callosum
Shipping	Dry ice
Preparation method	Monkey (Rhesus) medulla corpus callosum tissue lysate was prepared by homogenization using a proprietary technique. The tissue was frozen in liquid nitrogen immediately after excision and then stored at -70?C. The monkey (Rhesus) medulla corpus callosum tissue total protein is provided in a buffer including HEPES (pH 7.9), MgCl2, KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, NP-40, and a cocktail of protease inhibitors. For quality control purposes, the medulla corpus callosum tissue pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining. The medulla corpus callosum tissue is then Western analyzed by either GAPDH or β-actin antibody, and the expression level is consistent with each lot.
Diagnosis	Normal

Storage Buffer	HEPES pH 7.9, MgCl2, KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, and NP-40.
Storage Instruction	Store at 2-8?C for continuous use. For extended storage, freeze working aliquots at -70?C. Repeated freezing and thawing is not recommended. Under proper storage conditions the shelf life is half a year from the date of receipt.
Applications	Medulla Corpus Callosum lysate is for use in Western blotting, 10 µg to 20 µg per lane is recommended for mini gel.
