

TNFRSF4 protein-coupled magnetic MicroBeads

Cat. No. TNFRSF4-192M **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species Rat

Capacity for 1×10^9 total cells

Background

Expression of CD134 is restricted to activated CD4⁺ T cells and is up-regulated within hours after activation. CD134 and its ligand CD252 (CD134L, OX40L), which is expressed on activated T and B lymphocytes, are both members of the tumor necrosis factor receptor superfamily and were suggested to mediate the interaction between T cells and B cells.

Analysis

After overnight stimulation of rat spleen cells with PMA/Ionomycin and IL-4, activated T helper cells were isolated using CD134 MicroBeads, a MiniMACS Separator, and an MS Column.
