

iNKT Antibody-coupled magnetic MicroBeads

Cat. No. iNKT-392M **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species Human

Capacity for 2×10^9 total cells

Background

iNKT cells represent a distinct lymphocyte population, characterized by expression of an invariant T cell receptor α -chain and certain TCR β -chains (V α 24-J α 18 combined with V β 11). iNKT cells are involved in immunoregulatory processes such as tolerance, host defense, and tumor surveillance.

Due to the nature of the antibody, a limited degree of pre-activation of target cells might occur after separation with this product.
