

CD16 protein-coupled magnetic MicroBeads

Cat. No. CD16-0234M **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Capacity	for 2×10^9 total cells
Background	The CD16 antigen, which is a low-affinity Fc receptor for aggregated IgG, is expressed on neutrophils, NK cells, and macrophages. CD16 MicroBeads have also been used to deplete NK cells.
Application	Eosinophils isolated with CD16 MicroBeads are used for the functional analysis of surface molecules, or for studies on signal transduction, chemotaxis, cytokine expression, degranulation ⁴ , and apoptosis.
