

CD56 protein-coupled magnetic MicroBeads

Cat. No. CD56-5196M **Lot. No.** (See product label)

SPECIFICATION

Product Overview

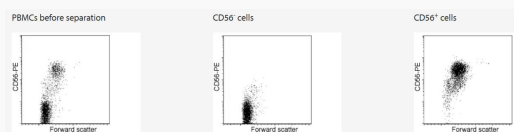

Species Human

Capacity for 1×10^9 total cells

Background CD56 is expressed on rhesus monkey monocytes. CD56 is also expressed on a minor subset of CD8+CD16- NK cells, while the predominant majority of rhesus monkey NK cells does not express CD56.

Application Non-human primate CD56 MicroBeads can be used for depletion of monocytes and a minor subset of CD56+ rhesus monkey NK cells, e.g., prior to positive selection of CD16+ NK cells using CD16 MicroBeads.

Analysis

Separation of CD56+ cells from rhesus monkey PBMCs using CD56 MicroBeads, a MiniMACS Separator, and an MS Column.
