

## Recombinant Human C17orf99 protein, hFc-tagged

**Cat. No.** C17orf99-93H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human C17orf99 protein(Q6UX52)(21-265aa), fused with C-terminal hFc tag was expressed in HEK293.                                                                                                                                                        |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                               |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                              |
| <b>ProteinLength</b>    | 21-265aa                                                                                                                                                                                                                                                            |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                                  |
| <b>Molecular Mass</b>   | 56.0 kDa                                                                                                                                                                                                                                                            |
| <b>AA Sequence</b>      | REEEITPVVSIAYKVLEVFPGKGRWVLITCCAPQPPPPITYSLCGTKNIKVAKKVVKTHE<br>PASFNLNVTLKSSPDLLTYFCWASSTSGAHVDSARLQMHVELWSKPVSELNFTL<br>QDRGAGPRVEMICQASSGSPITNSLIGKDGQVHLQQRPCHRQPANFSFLPSQTS<br>DWFWCQAANNANVQHSALTVPVPGGDQKMEDWQGPLESPILALPLYRSTRRLSEEE<br>FGGFRIGNGEVRGRKAAAM |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                      |

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.

**GENE INFORMATION**

|                  |                                                               |
