

Recombinant Human CD82 Protein (Gly111-Leu228), C-His tagged

Cat. No. CD82-3721H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human CD82 (Gly111-Leu228) fused with the C-terminal His tag was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
ProteinLength	Gly111-Leu228
Description	This metastasis suppressor gene product is a membrane glycoprotein that is a member of the transmembrane 4 superfamily. Expression of this gene has been shown to be downregulated in tumor progression of human cancers and can be activated by p53 through a consensus binding sequence in the promoter. Its expression and that of p53 are strongly correlated, and the loss of expression of these two proteins is associated with poor survival for prostate cancer patients. Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
Form	Lyophilized powder/frozen liquid
Molecular Mass	12.98 kDa
Endotoxin	< 1.0 EU/μg of the protein as determined by the LAL method.
