

Recombinant Human MTERF1 Protein (Met1-Lys191), N-His tagged

Cat. No. MTERF1-3751H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human MTERF1 (Met1-Lys191) fused with the N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Met1-Lys191
Description	This gene encodes a mitochondrial transcription termination factor. This protein participates in attenuating transcription from the mitochondrial genome; this attenuation allows higher levels of expression of 16S ribosomal RNA relative to the tRNA gene downstream. The product of this gene has three leucine zipper motifs bracketed by two basic domains that are all required for DNA binding. There is evidence that, for this protein, the zippers participate in intramolecular interactions that establish the three-dimensional structure required for DNA binding.
Form	Lyophilized powder/frozen liquid
Molecular Mass	24.46 kDa
Purity	>90% as determined by SDS-PAGE.
Notes	For research use only.
