

Recombinant Human PDGFRA Protein (Met1-Glu524), C-His tagged

Cat. No. PDGFRA-4841H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human PDGFRA (Met1-Glu524) fused with the C-terminal His tag was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
ProteinLength	Met1-Glu524
Description	PDGFRA (platelet-derived growth factor receptor A), also termed PDGFR α (platelet-derived growth factor receptor α), is a receptor located on the surface of a wide range of cell types. This receptor binds to certain isoforms of platelet-derived growth factors (PDGFs) and thereby becomes active in stimulating cell signaling pathways that elicit responses such as cellular growth and differentiation. The receptor is critical for the development of certain tissues and organs during embryogenesis and for the maintenance of these tissues and organs, particularly hematologic tissues, throughout life. Mutations in the gene which codes for PDGFRA, are associated with an array of clinically significant neoplasms.
Form	Lyophilized powder/frozen liquid
