

Recombinant Human Thrombopoietin

Cat. No. THPO-176H **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Source	Mammalian Cells
Description	Thrombopoietin (leukemia virus oncogene ligand, megakaryocyte growth and development factor), also known as THPO is a lineage-dominant hematopoietic cytokine. TPO is a glycoprotein hormone constitutively produced mainly by the liver and kidney and is the primary physiological regulator megakaryopoiesis and platelet production.
Molecular Weight	The predicted molecular weight of Recombinant Human TPO is Mr 35 kDa. However, the actual molecular weight as observed by migration on SDS Page is Mr 80-90 kDa.
State Of Matter	Lyophilized.
Biological Activity	The biological activity of Human Thrombopoietin is determined by the dose-dependent stimulation of the proliferation of human MO7e cells. The expected ED50 for this effect is 1.0-3.0 ng/ml.
Purity	>90% by SDS Page and analyzed by silver stain.
Endotoxin	<1.0 EU/g as determined by the LAL method.

Storage And Stability

This lyophilized protein is stable for six to twelve months when stored desiccated at -20°C to -70°C. After aseptic reconstitution, this protein may be stored at 2°C to 8°C for one month or at -20°C to -70°C in a manual defrost freezer. Avoid Repeated Freeze Thaw Cycles. See Product Insert for exact lot specific storage instructions.
