

Recombinant Human MUC16 Protein, His tagged

Cat. No. MUC16-01H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human MUC16 Protein with His-tag was expressed in HEK293.
Species	Human
Source	HEK293
Description	This gene encodes a protein that is a member of the mucin family. Mucins are high molecular weight, O-glycosylated proteins that play an important role in forming a protective mucous barrier, and are found on the apical surfaces of the epithelia. The encoded protein is a membrane-tethered mucin that contains an extracellular domain at its amino terminus, a large tandem repeat domain, and a transmembrane domain with a short cytoplasmic domain. The amino terminus is highly glycosylated, while the repeat region contains 156 amino acid repeats unit that are rich in serines, threonines, and prolines. Interspersed within the repeats are Sea urchin sperm protein Enterokinase and Agrin (SEA) modules, leucine-rich repeats and ankyrin (ANK) repeats. These regions together form the ectodomain, and there is a potential cleavage site found near an SEA module close to the transmembrane domain. This protein is thought to play a role in forming a barrier, protecting epithelial cells from pathogens. Products of this gene have been used as a marker for different cancers, with higher expression levels associated with poorer outcomes.
Molecular Mass	~ 75 kDa
AA Sequence	MEKIPVSAFLLLVALSHTLAHHHHHPGSRKFNTTERVLQGLLRPLFKNTSVGPLY

Purity ≥90% SDS-PAGE

Storage Long Term Storage at -20 to -80 centigrade. Avoid freeze/thaw cycles.

Concentration 0.55 mg/mL

Storage Buffer PBS, pH 7.4

GENE INFORMATION

Gene Name MUC16 mucin 16, cell surface associated [Homo sapiens (human)]

Official Symbol MUC16

Synonyms MUC16; mucin 16, cell surface associated; mucin-16; CA125; FLJ14303; CA-125; MUC-16; CA125 ovarian cancer antigen; ovarian carcinoma antigen CA125; ovarian cancer-related tumor marker CA125;

Gene ID 94025
