

Rhesus monkey Trachea Lysate

Cat. No. Trachea-542R **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species Rhesus macaque

Source Rhesus Lung: Trachea

Tissue Type Lung: Trachea

Shipping Dry ice

Preparation method

Monkey (Rhesus) trachea tissue lysate was prepared by homogenization using a proprietary technique. The tissue was frozen in liquid nitrogen immediately after excision and then stored at -70°C. The monkey (Rhesus) trachea tissue total protein is provided in a buffer including HEPES (pH 7.9), MgCl₂, KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, NP-40, and a cocktail of protease inhibitors. For quality control purposes, the trachea tissue pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining. The trachea tissue is then Western analyzed by either GAPDH or β -actin antibody, and the expression level is consistent with each lot.

Diagnosis Normal

Storage Instruction

Store at 2-8°C for continuous use. For extended storage, freeze working aliquots at -70°C. Repeated freezing and thawing is not recommended. Under proper storage conditions the shelf life is half a year from the date of receipt.
