

Recombinant Human CD274 Protein, Biotin Labeled

Cat. No. CD274-74H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CD274 Protein, was expressed in E. coli and biotin labeled conjugate.
Species	Human
Source	E.coli
Description	This gene encodes an immune inhibitory receptor ligand that is expressed by hematopoietic and non-hematopoietic cells, such as T cells and B cells and various types of tumor cells. The encoded protein is a type I transmembrane protein that has immunoglobulin V-like and C-like domains. Interaction of this ligand with its receptor inhibits T-cell activation and cytokine production. During infection or inflammation of normal tissue, this interaction is important for preventing autoimmunity by maintaining homeostasis of the immune response. In tumor microenvironments, this interaction provides an immune escape for tumor cells through cytotoxic T-cell inactivation. Expression of this gene in tumor cells is considered to be prognostic in many types of human malignancies, including colon cancer and renal cell carcinoma. Alternative splicing results in multiple transcript variants.
Purity	> 95% by SDS-PAGE
Quality Control Test	Correct disulfide bonds in PD-L1 were verified by Mass Spectrometry analyses. PD-L1 biotinylation is confirmed by streptavidin binding assay.
Storage	Avoid repeated freeze-thaw cycles. 12 months at -20 to -80 centigrade. 1 month at 2

to 8 centigrade.

Concentration 0.5 mg/mL

Storage Buffer 10 mM Bicine buffer at pH8.3, 50% glycerol.

Conjugation Biotin

GENE INFORMATION

Gene Name CD274 CD274 molecule [Homo sapiens (human)]

Official Symbol CD274

Synonyms CD274; CD274 molecule; CD274 antigen, PDCD1LG1, programmed cell death 1 ligand 1; programmed cell death 1 ligand 1; B7 homolog 1; B7 H; B7 H1; B7H1; PD L1; PDL1; CD274 antigen; PDCD1 ligand 1; programmed death ligand 1; B7-H; PD-L1; PDCD1L1; PDCD1LG1; MGC142294; MGC142296

Gene ID 29126

mRNA Refseq NM_014143

Protein Refseq NP_054862

MIM 605402

UniProt ID Q9NZQ7
