

Recombinant Staphylococcus aureus walk Protein (Lys208-Glu608), N-His tagged

Cat. No. walk-5758S Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Staphylococcus aureus walk (Lys208-Glu608) fused with the N-terminal His tag was expressed in E. coli.
Species	Staphylococcus aureus
Source	E.coli
ProteinLength	Lys208-Glu608
Description	Member of the two-component regulatory system Walk/WalR that regulates genes involved in cell wall metabolism, virulence regulation, biofilm production, oxidative stress resistance and antibiotic resistance via direct or indirect regulation of autolysins. Functions as a sensor protein kinase which is autophosphorylated at a histidine residue in the dimerization domain and transfers its phosphate group to the conserved aspartic acid residue in the regulatory domain of WalR. In turn, WalR binds to the upstream promoter regions of the target genes to positively and negatively regulate their expression.
Form	Lyophilized powder/frozen liquid
Molecular Mass	49.05 kDa
Purity	> 90 % as determined by SDS-PAGE

 45-1 Ramsey Road, Shirley, NY 11967, USA

Notes	For research use only.
Storage	Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 centigrade for one week. Store at -20 to -80 centigrade for twelve months from the date of receipt.
Storage Buffer	Lyophilized from a solution in PBS, pH 7.4, 0.02 % NLS, 1mM EDTA, 4 % Trehalose, 1 % Mannitol.
Reconstitution	Reconstitute in sterile water for a stock solution.
Shipping	They are shipped out with dry ice/blue ice unless customers require otherwise.
GENE INFORMATION	
Official Symbol	walk
Synonyms	Sensor protein kinase Walk; walk; EC:2.7.13.3; vicK; MW0019
UniProt ID	Q7A215
SDS-PAGE	 The image shows an SDS-PAGE gel. Lane M contains molecular weight markers with labels at 250, 150, 100, 70, 50, 40, 35, 25, 20, 15, and 10 kDa. Lane R shows a single, prominent protein band at approximately 50 kDa.
