

## Recombinant H5N1 (A/Hong Kong/483/97) HA protein, His-tagged

**Cat. No.** HA-3281V    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                        |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant H5N1 (A/Hong Kong/483/97) HA protein(Met 1-Gln 531)(AAC32099.1)(HA1+HA2, uncleaved, cleavage site mutated (RRRKRR-TETR) was expressed in HEK293, fused with a C-terminal polyhistidine tag.                                                                |
| <b>Species</b>          | H5N1                                                                                                                                                                                                                                                                   |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                                 |
| <b>ProteinLength</b>    | 1-531 aa                                                                                                                                                                                                                                                               |
| <b>Form</b>             | Lyophilized from sterile PBS, pH 7.4.                                                                                                                                                                                                                                  |
| <b>Molecular Mass</b>   | The secreted recombinant influenza A H5N1 HA (A/Hong Kong/483/97 (H5N1)) comprises 524 amino acids and has a predicted molecular mass of 59.7 kDa. As a result of glycosylation, it migrates as an approximately 65-75 kDa band in SDS-PAGE under reducing conditions. |
| <b>Endotoxin</b>        | < 1.0 EU per µg of the protein as determined by the LAL method.                                                                                                                                                                                                        |
| <b>Purity</b>           | > 97 % as determined by SDS-PAGE                                                                                                                                                                                                                                       |
| <b>Storage</b>          | Store it under sterile conditions at -20°C to -80°C upon receiving. Recommend to aliquot the protein into smaller quantities for optimal storage. Avoid repeated freeze-thaw cycles.                                                                                   |

## Reconstitution

It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.

## SDS-PAGE
