

Recombinant Influenza A H12N1 (A/mallard duck/Alberta/342/1983) HA protein(Met1-Arg342), His-tagged

Cat. No. HA-3302V **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Influenza hemagglutinin (A/mallard duck/Alberta/342/1983 (H12N1)) (ABB88099.1)(Met 1-Arg 342), termed as HA1, was expressed in HEK293, fused with a polyhistidine tag at the C-terminus.
Species	H12N1
Source	HEK293
ProteinLength	Met1-Arg342
Form	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Molecular Mass	The secreted recombinant HA1 subunit of influenza A H12N1 HA (A/mallard duck/Alberta/342/1983(H12N1)) comprises 336 amino acids and has a predicted molecular mass of 38.3 kDa. As a result of glycosylation, it migrates as an approximately 55 kDa band in SDS-PAGE under reducing conditions.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method
Purity	> 97 % as determined by SDS-PAGE
Storage	Samples are stable for up to twelve months from date of receipt at -20°C to -80°C. Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein

be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.
