

# Recombinant Human DFFB Protein(11-290aa), His-tagged

**Cat. No.** QKI-11H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                          |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human DFFB Protein(11-290aa)(Q96PU8), fused with C-terminal His tag, was expressed in E. coli.                                                                                                                                                                                               |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                    |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                   |
| <b>ProteinLength</b>    | 11-290aa                                                                                                                                                                                                                                                                                                 |
| <b>Form</b>             | 0.15 M Phosphate buffered saline.                                                                                                                                                                                                                                                                        |

| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                                                           |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.                                                                                                                            |
