

## Recombinant Human CD163L1 protein(48-469aa), His&Myc-tagged

**Cat. No.** CD163L1-6432H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                    |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human CD163L1 protein(Q9NR16)(48-469aa), fused with N-terminal His tag and C-terminal Myc tag, was expressed in E.coli.                                                                                                                                                                                |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                              |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                             |
| <b>ProteinLength</b>    | 48-469aa                                                                                                                                                                                                                                                                                                           |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                                                                                 |
| <b>Molecular Mass</b>   | 54.1 kDa                                                                                                                                                                                                                                                                                                           |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                        |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                                                                     |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. |

## GENE INFORMATION

**Gene Name** [CD163L1 CD163 molecule-like 1 \[ Homo sapiens \]](#)

**Official Symbol** [CD163L1](#)

**Synonyms** CD163L1; CD163 molecule-like 1; CD163 antigen like 1; scavenger receptor cysteine-rich type 1 protein M160; CD163B; M160; CD163 antigen B; CD163 antigen-like 1;

**Gene ID** [283316](#)

**mRNA Refseq** [NM\\_174941](#)

**Protein Refseq** [NP\\_777601](#)

**MIM** [606079](#)

**UniProt ID** [Q9NR16](#)
