

## Recombinant Bovine INS protein

Cat. No. INS-10B    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                                                                                                                                                                     |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Bovine INS protein was expressed in E. coli.                                                                                                                                                                                                                                                            |
| Species          | Bovine                                                                                                                                                                                                                                                                                                              |
| Source           | E.coli                                                                                                                                                                                                                                                                                                              |
| Purity           | ≥90%                                                                                                                                                                                                                                                                                                                |
| Storage          | Preserve in tight containers, protected from light. Lyophilized powder is stable for 24 months when stored below -15°C.<br>If not used immediately, store temporarily at 2-8°C, protected from light.<br>Transportation stability: This product is stable during insulated transportation with ice bags or dry ice. |
| Reconstitution   | Recommended concentration for cell culture: 2-20 mg/L.                                                                                                                                                                                                                                                              |
