

## Anti-human IgG Fc antibody, APC Conjugated

**Cat. No.** CBM-IgG-Fc-02    **Lot. No.** (See product label)

### SPECIFICATION

#### Product Overview

|                          |                                                                                                                                                                                      |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Species</b>           | Human                                                                                                                                                                                |
| <b>Source</b>            | Monoclonal Mouse IgG1 Clone # 97924                                                                                                                                                  |
| <b>Conjugation/Label</b> | Allophycocyanin<br>Excitation Wavelength: 620-650 nm<br>Emission Wavelength: 660-670 nm                                                                                              |
| <b>Bio-activity</b>      | Detects chimeric proteins containing a human IgG Fc region in direct ELISAs and Western blots.                                                                                       |
| <b>Immunogen</b>         | Mouse myeloma cell line NS0 derived recombinant human IgG1 Fc region                                                                                                                 |
| <b>Purity</b>            | Protein A or G purified from hybridoma culture supernatant                                                                                                                           |
| <b>Applications</b>      | Flow Cytometry: 10 µL/10 <sup>6</sup> cells                                                                                                                                          |
| <b>Storage</b>           | 12 months from date of receipt, 2 to 8 centigrade as supplied. Avoid repeated freeze-thaw cycles. Protect from light.                                                                |
| <b>Storage Buffer</b>    | Supplied as 2.5 µg of antibody in 0.25 mL saline solution containing 0.5% BSA and 0.09% Sodium Azide.<br>*Contains < 0.1% Sodium Azide, which is not hazardous at this concentration |
