

## Recombinant Human TSH protein

**Cat. No.** TSH-02H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                               |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human TSH protein is expressed in CHO cells, which is non-covalently linked by alpha subunits (NP_000726. 1) and beta subunits (NP_0005402) into heterodimers.    |
| <b>Species</b>          | Human                                                                                                                                                                         |
| <b>Source</b>           | CHO                                                                                                                                                                           |
| <b>Form</b>             | PBS, pH7.4.                                                                                                                                                                   |
| <b>Molecular Mass</b>   | 94-104kDa                                                                                                                                                                     |
| <b>Purity</b>           | >98%                                                                                                                                                                          |
| <b>Storage</b>          | This product can be stored at -70°C for 36 months; Store at -20°C for 12 months; It can be stored at 2-8°C for 1 month. Avoid repeated freeze-thaw.                           |
| <b>Concentration</b>    | 1mg/ml                                                                                                                                                                        |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents. |
