

# Recombinant Cynomolgus TPBG protein, His-tagged

**Cat. No.** TPBG-1640C    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                          |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Cynomolgus TPBG protein(Q4R8Y9)(Thr35-Ser355), fused with C-terminal His tag, was expressed in HEK293.                       |
| <b>Species</b>          | Cynomolgus                                                                                                                               |
| <b>Source</b>           | C-His                                                                                                                                    |
| <b>ProteinLength</b>    | Thr35-Ser355                                                                                                                             |
| <b>Tag</b>              | C-His                                                                                                                                    |
| <b>Form</b>             | Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.           |
| <b>Bio-activity</b>     | 5T4-CM101                                                                                                                                |
| <b>Molecular Mass</b>   | The protein has a predicted MW of 35.95 kDa. Due to glycosylation, the protein migrates to 60-70 kDa based on Tris-Bis PAGE result.      |
| <b>Endotoxin</b>        | Less than 1EU per µg by the LAL method.                                                                                                  |
| <b>Purity</b>           | > 95% as determined by Tris-Bis PAGE; > 95% as determined by HPLC.                                                                       |
| <b>Storage</b>          | Reconstituted protein stable at -80°C for 12 months, 4°C for 1 week. Use a manual defrost freezer and avoid repeated freeze-thaw cycles. |

## Reconstitution

Centrifuge tubes before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.

## Tris-Bis PAGE

## ELISA
