

## Recombinant Human SLC30A8 protein, His-tagged

**Cat. No.** SLC30A8-1215H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                               |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human FDP protein was expressed in E. coli.                                                                                                                       |
| <b>Species</b>          | Human                                                                                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                                                                                        |
| <b>Tag</b>              | Non                                                                                                                                                                           |
| <b>Form</b>             | PBS, pH7.4, 1mM DTT, 1mM EDTA.                                                                                                                                                |
| <b>Storage</b>          | Upon receipt, aliquot and store at <-20°C for long term. Avoid repeated freeze and thaw cycles.                                                                               |
| <b>Concentration</b>    | 4.4mg/ml                                                                                                                                                                      |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents. |
