

# Recombinant Rat Rbck1 protein, His&Myc-tagged

**Cat. No.** Rbck1-3456R    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rat Rbck1 protein(Q62921)(1-508aa), fused with N-terminal His tag and C-terminal Myc tag, was expressed in E.coli.                                                                                                                   |
| <b>Species</b>          | Rat                                                                                                                                                                                                                                              |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                           |
| <b>ProteinLength</b>    | 1-508a.a.                                                                                                                                                                                                                                        |
| <b>Tag</b>              | His&Myc                                                                                                                                                                                                                                          |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.               |
| <b>Molecular Mass</b>   | 65.1 kDa                                                                                                                                                                                                                                         |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                                      |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                   |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final |

## GENE INFORMATION

**Gene Name** [Rbck1 RanBP-type and C3HC4-type zinc finger containing 1 \[ Rattus norvegicus \]](#)

**Official Symbol** [Rbck1](#)

**Synonyms** RBCK1; RanBP-type and C3HC4-type zinc finger containing 1; ranBP-type and C3HC4-type zinc finger-containing protein 1; RBCC protein interacting with PKC 1; protein kinase C-binding protein Beta15; protein kinase C-binding protein beta-15; heme-oxidized IRP2 ubiquitin ligase 1 homolog; ubiquitin-conjugating enzyme 7-interacting protein 3; HOIL-1; Pkcbpb15;

**Gene ID** [60383](#)

**mRNA Refseq** [NM\\_021764](#)

**Protein Refseq** [NP\\_068532](#)
