

Recombinant Human PPARG coactivator 1 alpha Protein, His tagged

Cat. No. PPARGC1A-32H Lot. No. (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Human peroxisome proliferator-activated receptor gamma, coactivator 1 alpha (PPARGC1A), Phe511-End, with N-terminal His tag, expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	511-End
Description	The protein encoded by this gene is a transcriptional coactivator that regulates the genes involved in energy metabolism. This protein interacts with PPARGgamma, which permits the interaction of this protein with multiple transcription factors. This protein can interact with, and regulate the activities of, cAMP response element binding protein (CREB) and nuclear respiratory factors (NRFs). It provides a direct link between external physiological stimuli and the regulation of mitochondrial biogenesis, and is a major factor that regulates muscle fiber type determination. This protein may be also involved in controlling blood pressure, regulating cellular cholesterol homoeostasis, and the development of obesity.
Tag	N-His
